Fish Fact!

Fish are one of the oldest animal families to live on Earth. They were here long before the dinosaurs – about 500 million years ago – and they still thrive. There are over 25,000 known species of fish. There are probably many more that we haven't discovered yet.

Fish Fact!

The largest fish is the great whale shark. It can grow to 50 feet long. The tiny Philippine goby is about the size of your pinky fingernail.
