Fish Fact!

Fish are one of the oldest animal families to live on Earth. They were here long before the dinosaurs - about 500 million years ago - and they still thrive. There are over 25,000 known species of fish. There are probably many more that we haven't discovered yet.

Fish Fact!

The largest fish is the great whale shark. It can grow to 50 feet long. The tiny Philippine goby is about the size of your pinky fingernail.

BRAIN TEASER

- How far can a rabbit run into the woods?
- Jimmy's mother had four children. She named the first Monday, the second Tuesday, and she named the third Wednesday. What is the name of the fourth child?
- What can you hold without ever touching or using your hands?
- You have a 3-gallon jug and a 5-gallon jug. You need to measure out exactly 7 gallons of water. How can you do it?
- I am the beginning of sorrow and the end of sickness. You cannot express happiness without me yet I am in the midst of crosses. I am always in risk yet never in danger. You may find me in the sun, but I am never out of darkness.
- Your parents have six sons including you and each son has one sister. How many people are in the family?

GENERAL KNOWLEDGE QUESTIONS

- What is the Capital of Ireland?
- What county is the Burren in?
- What type of stone is found in the Burren?
- What fish is the only fish that has eyelids?
- What fish is the only fish that swims upright?
- What is the nearest Star to planet Earth?
- What is the least populated country in the world?
- Is the dolphin a fish or a mammal?
- What are female elephants called?
- What is the best Seafood Restaurant in Ireland?

Fish Fact!

Some fish live in salt water, such as halibut and cod. They live in oceans and seas. Freshwater fish, such as trout and catfish, live in lakes and rivers.
